## Area Studies Programs

Area-studies programs typically draw on disciplines such as political science, history, sociology, ethnology, geography, linguistics, literature, and cultural studies. Today's area studies can be seen as having their origins in the colonial expansion of European powers during the 18th century and the accompanying academic efforts to better understand the languages, cultures, and social organizations of colonized peoples. In that sense, area studies emerged as a "child of empire," often ...

## Area studies | social research | Britannica

It is suggested that there have been four stages in the development of relationships between area studies and the social sciences; that is to say—naming the extremes—between the gathering of data and its ordering by theoretical constructs. In the first stage, data about foreign areas were collected through field research by area specialists.

## Area Studies | Encyclopedia.com

In some ways, the social sciences: sociology, economics, and particularly politics or political science, have brought the notion of 'discipline' itself to area studies (history straddles the border between social science and humanities; for the purposes of appraisal and analysis here, I will refer to history specifically when appropriate, but generally have treated it as in the humanities).

graduate students here), disagreement over the adoption of multidisciplinary approaches and a struggle to make academic structures respond to international, political and demographic ones.

## ~~Interaction: The new world of area studies~~

Area studies are interdisciplinary fields of research and scholarship pertaining to particular geographical, national/federal, or cultural regions. The term exists primarily as a general description for what are, in the practice of scholarship, many heterogeneous fields of research, encompassing both the social sciences and the humanities. Typical area study programs involve international relations, strategic studies, history, political science, political economy, cultural studies, languages, ge

## ~~Area studies—Wikipedia~~

Area studies The term area studies is generally applied to a variety of social science and humanities fields. Area studies utilize multiple academic fields of research to examine the geography, politics, and culture of a particular locale. Request Information about Courses in Area studies 2021
