Areas of lower limb draining into superficial inguinal lymph nodes. Muscles of the anterior/extensor compartment of leg and their nerve supply. Muscles of the lateral/peroneal compartment of leg and their nerve supply. Muscles of the posterior/flexor compartment of leg and their nerve supply.

## ~~Lower Limb – Important Questions , Anatomy QA~~

In the realm of anatomy, the 'leg' is strictly the region between the knee and the ankle joints rather than the entire lower extremity, as erroneously referred to in common language. In this small section, we'll briefly mention the main parts of the leg, namely the bones, muscles, and neurovasculature.
