engine. Most likely, there is a blown head casket, cracked cylinder head or a cracked engine block that is letting water slip into the engine and into the mixture, resulting in the white smoke and water coming out of the exhaust pipe.

A Liquid Comes Out Of My Exhaust Pipe What Could This Be?

If you notice coolant there, you might have a problem with your head gasket or a cracked cylinder head. If you can't find any coolant there, remove the pipes to the EGR pipes and check for any signs of coolant inside of them. If you notice coolant, there is most likely a crack in the EGR cooler, and you have to replace it.

White Smoke from Exhaust - Main Causes & Fixes -
Mechanic Base

A drain is a pipe that drains water and waste from a building and other buildings which belong with it, for example a garage. A lateral drain is a length of pipe which carries wastewater away from your property to a sewer. It's usually located outside your property boundary, often under a public pavement or road.

Who is responsible for repairing drains and sewers ...

Hey, I have a small pipe or tubing that sticks out of the brickwork that belongs to the 'toilet room' (its downstairs). It drips continuously (its on the outside of the house), i was wondering if its some sort of condensation prevention for the

How To Clean A Shower Head - Top 3 Tips

Formula For Head When the length and diameter of a pipe are known, the head required to discharge a certain quantity of water per second can be found by the formula:

$h = .000704q^2 / d^5 l$ In which h =head in feet l =length of pipe in feet d =diameter of pipe in feet q =quantity of water in cubic feet per second.

Flow Of Water Through Pipes Formulas

Take a look at the O-ring or washer as this is the part that prevents any water from leaking out. If it looks visibly worn or damaged it's time to replace this with a new item. If it looks fine, simply apply some thread seal tape to the threads located on the tip of the pipe stem.
