For several decades, our country and world have witnessed poverty's damaging influence on child health and development. We've seen how malnutrition, lead poisoning. (link is external) and poor access to quality health care — all ripple effects of financial insecurity — influence a child's ability to think, learn and interact with those around them. We've seen how the stress of growing up in a household strapped for resources.

Poverty & development. Despite enormous gains in the wellbeing and economic circumstances of hundreds of millions of people, 10% of the world's population still live on less than \$2 a day. High population growth traps individuals, communities and even entire countries in poverty. Achieving sustainable population levels, locally and globally, helps people achieve the dignity and standard of living we all deserve.
