Pry up each locking tab and gently push the top of the lens away from the assembly -- just enough so that the lens doesn't lock back into place when you remove the screwdriver. Work your way around the headlight housing and pry each locking tab until all are unlocked. Continue heating around the assembly as you separate the lens from the assembly.

How to Remove Condensation From Headlights | It Still Runs

First remove the front panel cover below the headlight to access the bottom screw of the headlight housing. There is also two screws on the top of the housing. Once you have removed the headlight, turn the headlight around and remove the bracket that holds the Ballast. Then remove the ballast using a philip screwdriver.

Open the hood and make sure the car and the lights are off. Remove the plastic protective cover. There are 3 knobs, turn halfway and pull. Put aside and out of the way. Remove the three pins that are holding the light assembly in place. These are flat rods with a little bend at the end. Twist and un-plug the lights, now you can remove the whole lens.

Replace headlight assembly '97 Lincoln Town Car - Fixya

On an '07 GS350, fishing the ballast-to-headlight connector cable through the headlight assembly is nearly impossible. Some people take off their headlight covers with a heat gun (which shouldn't be done without replacing the headlight lens and applying fresh sealant) while others cut a hole in the bottom to make room for it to pass by.
