Quality standards contain associated quality measures to help you: measure levels of care; develop tools and metrics; measure quality improvement after implementing changes. Measurement is essential to show that changes to care or services have resulted in an improvement. It's a key part of the Plan-Do-Study-Act (PDSA) improvement cycle. If measurement shows there has been no improvement, you need to adapt the change or try something different.

*Quality and academic standards : Quality Framework ...*

Quality assurance is a way of preventing mistakes and defects in manufactured products and avoiding problems when delivering products or services to customers; which ISO 9000 defines as "part of quality management focused on providing confidence that quality requirements will be fulfilled". This defect prevention in quality assurance differs subtly from defect detection and rejection in quality control and has been referred to as a shift left since it focuses on quality earlier in the process. T
